## Disclaimer

### **Important information is attached to the disclaimer so please read it carefully.**

- 1 This white paper is intended for reference and has not been reviewed or approved by the relevant authorities to provide the information that the SUT project team is planning. This white paper is intended for informational purposes only and is not for solicitation or advice on law, taxation, finance, accounting, regulation, etc., nor for inducing the purchase or sale of coins or tokens or for providing a basis for transactions. Please note that the purchase of coins and tokens will require you to consult with experts in law, tax, finance, accounting, regulation, and determine the potential benefits and possible burdens and other adverse consequences of such transactions, and may require you to take economic risks for unpredictable periods of time.
- 2 The statements and information contained in this White Paper are not current and are predictive of the future. Please note that these forward-looking statements and information are uncertain to contain known or unknown risks, and that the actual results may differ materially from the results of participants' speculation from the statements or information in the White Paper or from the results implied or indicated by the White Paper.
- 3 This white paper has no legal binding effect on the SUT project team. Members of the SUT project team do not guarantee the accuracy, reliability, etc. of the white paper or are not liable for any consequences. The SUT project team may modify, add or delete part of the white paper for any reason or at any time.
- 4 This white paper is not a plan for issuing securities, nor is it intended to encourage investment or to issue or buy securities. Therefore, participants should be aware that coins and tokens do not refer to securities, and that this white paper is not intended for issuing securities, nor is SUT tokens given any kind of dividends or voting rights, and should they avoid participating for the above purposes.
- 5 The SUT Project Team will continue to conduct a legal review of the content of the White Paper, but does not guarantee the legality of the White Paper, non-infringement of third-party rights, possession of commercially useful value, integrity of the White Paper's content, etc. The SUT Project Team will not be liable for any form of compensation, compensation or other financial damage caused by investors reading this White Paper or any decision, such as losses, liabilities.
- 6 In the SUT token transaction, participants in the transaction shall not provide, distribute, resell, or transfer SUT tokens to citizens, natural persons, or corporations (hereinafter referred to as the "Restrictor of Participation") in the area where the laws, policies, etc. of the State prohibit or restrict digital token transactions. Therefore, participants may not participate in the transaction of tokens related to this white paper. Please note that any responsibility arising from the intervention of the restriction of participation rests with the restriction of participation or the person who has provided, distributed, resold, or transferred it to the restriction of participation.

- 7 The SUT Project Team may reject requests to purchase coins or tokens at any time if the identity information provided by the person who intends to participate in the token transaction related to this white paper is insufficient, inaccurate, or other misleading, or presumed to be a restriction on participation. In addition, you must not participate in the transaction of coins or tokens with criminal proceeds such as drug transactions, or participate in the transaction of tokens for the purpose of money laundering or terrorist financing. If the restriction on participation purchases coins or tokens, or for illegal and unauthorized funds and purposes, the transaction may be prohibited and restricted at any time, and the purchase of such coins or tokens may be canceled or invalidated.
- 8 Identifying whether coins and tokens can be legally purchased in a participant's area and resold coins and tokens to other buyers in a particular area is the participant's own judgment, and this white paper does not provide a basis for such judgment, nor does the SUT project team take any responsibility for the participant's misjudgment.
- 9 SUT will continue its legal review of the legality of its business using Main App and numerous upcoming services, but please note that regulatory measures or laws may prevent it from obtaining regulatory approval commercially in some cases and may be suspended by each country's jurisdiction.
- 10 The token distribution plan included in the white paper has already been completed, and the foundation that issued the SUT does not have any SUT for the purpose of casting gains. In the future, you will have SUTs that have been paid for by the platform business, purchased on the exchange, or credit-traded through the global blockchain credit trading platform SuperSave.
- 11 This white paper and related documents may be translated to documents other than Korean, and if there is a discrepancy between the Korean and foreign versions, the Korean version will take precedence.
- 12 SUT Project Team, SUT's disclaimer is not limited to the above mentioned.

01

# Overview

Overview of the SUT Project

# SUPER TRUST

## No SUT held for casting gain purpose (Zero)

The SUT token has a total issue volume of 238,403,732 and 50,000 were incinerated, and is currently in 100% circulation of 188,403,732 units. Therefore, there is no SUT for casting gain held by the foundation and it is zero. The SUT boasts 100% transparency that does not allow unscrupulous behavior by the foundation. In addition, the distribution is ultra-miniature.

Since all of the issued SUTs are in circulation, the holders' stake in the SUT is determined. another coin is found to be It is difficult for platform operators to adopt it as a payment coin due to the possibility of increased circulation due to the possibility of increased circulation due to holding the target volume of the mint profit, but SUT can be adopted as a payment coin by platform operators with confidence because the increase in circulation no longer occurs.

## Global Blockchain Real Economy Platform

Creating a physical economic platform is a challenge.

The SUT will launch MOAD, a global blockchain real economy platform, in the second half of 2024, and is developing a global real-time natural drawing platform, Nature Book. It is awaiting further launch of the Nature Book in the first half of 2025.

We launch a real economy platform before listing on domestic and international cryptocurrency exchanges. The SUT token is an Ethereum Layer 2 Polygon network-based token. It has the best conditions as a payment coin with stable, fast transfer speed and low commission fees.

## Real Economy Platform Online Payment Token SUT(Super Trust Token)

The total amount of SUT tokens issued is 238,403,732, 50,000 were incinerated, and the current circulation is 88,403,732 in 100% circulation. Therefore, there is no SUT for casting gains held by the Foundation and it is zero.

SUT is used for online payments on the launching blockchain-based real economy platform.

In Korea, we contribute to the purchase of SUT live-action purchases by applying an exceptional discount of 30% to 50% on the platform usage fee directly operated when paying for SUT coins.

In addition, it will conduct SWAP with real economy platform Linked Coin MSQUARE (MSQ), which is currently listed on GOPAX, the Korean won virtual asset exchange. MSQUARE currently has Meta Star as its affiliate, which has customers of public enterprises, banks, and large corporations, and has POINTTOYOU, a small business sales increase project that has become a leader in blockchain app technology with 320,000 stores registered.

02

# Background

The Shadow of the Crypto Industry

## The shadow hanging over the rapid growth of the cryptocurrency industry

In general, the entity responsible for the issuance and operation of tokens, or coins, is called the foundation. The Foundation will secure funds for the project through the issuance of tokens or coins, the White Paper, which contains plans for the project, and the disclosure of cryptocurrency (ICO). With the funds secured, the foundation will proceed with the project that will be the use of future coins. If the projects disclosed in the white paper go smoothly as planned, the owners of the coins purchased will be compensated for the increase in assets due to the expected increase in prices.

However, that is not the case in reality. Most foundations, excluding a few, are often seen to commit immoral acts for the purpose of not carrying out the plan for the project disclosed in the white paper with funds for the secured project or for the purpose of preventing the project from being carried out in the first place. It is common for so-called "scam" coins to be bought and the purchase of coins to lead to a 100% loss. Therefore, it is necessary to determine whether the content of the project initially disclosed in the white paper is feasible and whether there is a principle and structure in which the coin can actually be used.

Even if the business goes well, there is another problem. The amount of coins held by the foundation in which the coins were issued will be distributed to the market at any time, increasing the volume of distribution and decreasing the share ratio of the holders held by the coins. In other words, many foundations with the largest volume are being sold on the exchange in the name of the use of additional business funds. That's why it is ironic that coin holders are sold out on the day they are listed on the exchange. As published in the White Paper, the confidence that the project will go well has long disappeared, and the foundation intends to sell its supplies before they are sold.

Due to the foundation's immoral behavior, compliance with the thorough distribution plan has been recommended and monitored on the recent stock exchange. However, there is no law on the business rights of cryptocurrency, so there is no way to prevent the increase in the distribution volume of the foundation's goods.

It is true that it is not easy to make profits from coins, with the business usually disclosed in the white paper waiting for a short period of two to three years, and the foundation having to endure the immoral act of selling additional supplies.

The problems mentioned above, which are emerging with the development of the cryptocurrency industry, must be solved to be reborn as a sound and attractive market.

03

# Our Mission

A New Ecosystem with Blockchain

## Transparency

### SUT

**Total amount issued**

238,403,732

**Distribution volume**

188,403,732 (Sale 100%)

**The foundation's holdings** 0 (Zero)

**Burn Amount** 50,000,000

The total number of SUTs issued is 238,403,732, and 50 million have been incinerated, and 188,403,732 are 100% in circulation. Therefore, there is no SUT for the purpose of casting gains held by the company. There is no increase in distribution volume when listing on the exchange, and other coin foundations generally secure additional business funds by selling the cutting volume by circulating the cutting volume on the market. It is common to have the largest number of coins issued by the foundation, and coin holders also tend to recognize the foundation's holdings to secure funds for the business process. However, reckless and immoral sale of cutting volume should be eradicated in the future.

It is difficult for real economy platform operators to adopt coins with a large amount of foundation for the purpose of minting profits as payment coins. This is because there is no alternative to the decline in asset value if the coin foundation sells additional coins on the exchange to secure business funds due to the operation of the platform.

Since the SUT has zero cutting reserves for the purpose of casting gains, there will be no increase in distribution in the future. Operators can adopt the SUT as a platform payment coin that directly operates the SUT with confidence. In addition, SUT, an Ethereum (ETH) Layer 2 Polygon network-based token, boasts very high transmission speed and low transmission fees. It is perfect for use as a global payment token.

## Business Easibility

- SUT Global Blockchain Real Economy Platform Interworking
- Real economy platform payment token with intrinsic value

SUT is a foundation that operates in conjunction with SUT, and at the same time, it is a real economy platform startup company. A business profit model is required to conduct business in a state of zero (zero) foundation retention. The foremost purpose of establishing the SUT is not just profit-seeking. Therefore, most of the profits generated from the platform provide high-quality services to platform users by maximizing continuous platform development and platform advancement. Since SUT is a global blockchain real economy platform company, it is a real economy platform business that maximizes sales growth and operating profit at the same time, not a manufacturing and distribution business that does not draw a relatively upward curve. The bold development investment of operating profit and expansion of operating infrastructure that increases with sales enter a virtuous cycle structure that provides high-quality services to platform users. When it is linked to a real economy platform and adopted as a payment token, intrinsic value is generated. It will be the first of 30,000 coins in the world to directly develop, launch, and operate a real economy platform, adopt SUT as a payment token, and provide exceptional and bold discounts of 30-50% if you pay for the platform with SUT, creating an environment where users have no choice but to use SUT.

## Profitability

Real Economy Platform Earnings

We operate our business with the financial resources of business sales revenue through the global real economy platform. SUT is a platform startup company that directly plans, develops, and operates real economy platforms. The global direct advertising platform MOAD (mode) is scheduled to be launched in the second half of 2024, and the global real-time natural drawing platform Nature Book is scheduled to be launched in the first half of 2025. The profits generated by the platform's sales will be attributed to the financial resources, and the business will be able to continue to expand and operate.

The text "Global Direct Advertising Platform" is written in a white, sans-serif font on a dark blue background that is part of a large graphic overlay on the left side of the page.The word "MOAD" is written in a large, bold, white, sans-serif font on a dark blue background, which is part of a large graphic overlay on the left side of the page.

Mod eliminates commissions from intermediate advertising brokers and realizes reasonable advertising costs through direct advertising contracts between advertisers and advertisers.

Mod is leading truck advertising nationwide based on its creative and professional organization in line with rapidly changing times. By providing advertisers with higher value advertising media, we increase the growth of advertisers (customers) and brand image value. In addition, by identifying and analyzing the NEEDS of advertisers (customers), we provide the service that advertisers (customers) want through innovative truck advertising.

Advertising publishers (users) can receive additional revenue rewards through direct contracts with advertisers (customers).

Mode starts with commercial truck and wing body vehicle advertisements nationwide. A large database of commercial trucks and wing bodies nationwide has been secured. Starting with this, we plan to expand to all advertising sectors such as domestic and global outdoor advertising.

It is equipped with a cryptocurrency payment system in the mode platform to provide a 30% to 50% discount on advertising execution costs when paying with SUT.

#### **MOAD Truck Advertising**

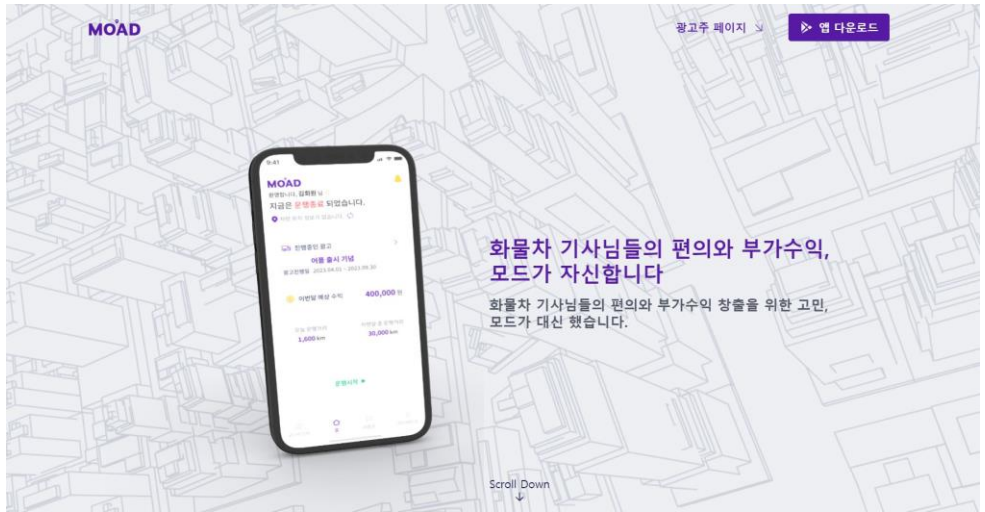

- Attaching customer advertisements to the side of the truck to provide advertisers with low-cost and efficient advertising effects
- Provide fixed income to car owners to provide services for advertisers and car owners to win-win
- Liquidity that can be used to provide various information, such as corporate promotion, product promotion, and local government policy promotion
- Compared to other outdoor advertisements and transportation advertisements, it is more efficient in terms of cost and exposure

#### **Cryptocurrency Payment**

- 30% to 50% discount on advertising execution costs for SUT payment

**MOAD Freight  
Cargo Page**

Launching in the  
second half of 2024

**MOAD Advertiser Page**

Launching in the second half of 2024

Global real time natural  
drawing platform

# Nature Book

NatureBook is a global real-time natural drawing created by users who love nature around the world. Global users share beautiful natural scenery, flowers, and plants in their respective areas so that users around the world can enjoy them.

It allows you to feel the nature of the Earth by continuously updating photos and videos taken in the present, not the past, and in real-time. All users around the world support saving, protecting, and protecting the Earth's nature.

Users will be able to mine P2U coins for free if they share the beautiful nature of the Earth. P2U coins will be able to be traded individually as SUT tokens through transactions with users who need P2U coins.

## NatureBook Platform

- Platform user's ability to share natural scenery
- Platform user expandable
- Proceed with advertising within the platform to generate revenue

## Cryptocurrency Payment

- Pay for paid services with SUT coins

Our Mission : Global user's view of nature around the world

### Global Users

Share the Nature of the Earth with users  
all over the world

You can share and appreciate the beautiful  
nature of the earth in real time, not in the  
past.

### Compensation

Share nature, earn rewards

Get rewarded with P2U for your  
efforts to share Earth's beautiful  
nature.

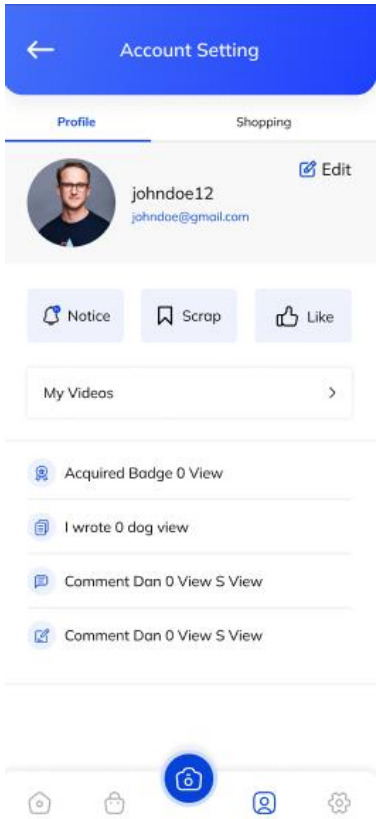

### Earth Protection

Let's Protect the Earth!

Let's protect the endangered  
nature of the Earth.

NatureBook  
APP Image

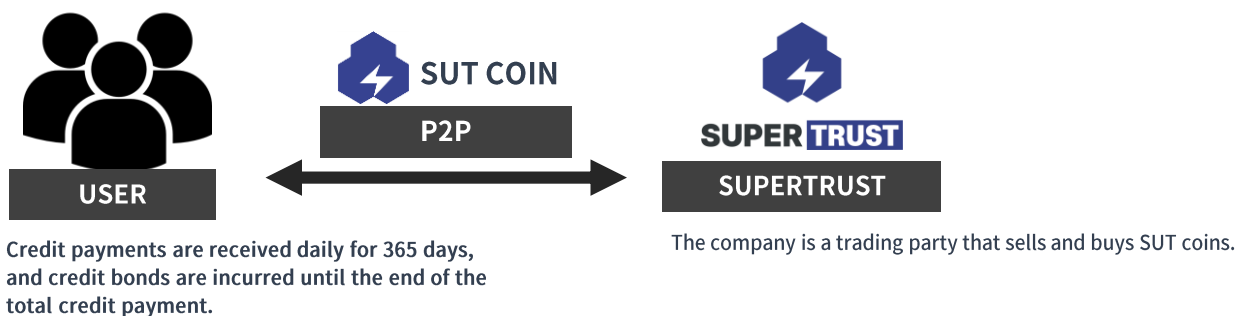

Global Blockchain Credit Trading Platform

# SUPER SAVE

SuperSave aims to increase global users to spread the ecosystem of SUT's real economy platform and to expand SUT's real-life fixed purchase tax.

The super save credit transaction will properly reflect the present and future values of the SUT, reflecting market principles, and will be purchased at a negotiated price between the parties to the transaction.

SuperSave is a novel platform that will make the SUT real economy platform user growth a steep upward curve.

Users who are credit sellers transfer ownership of SUT coins to the company at the time of transaction and become creditors to secure the right to receive credit payments.

At the time of the transaction, the company, which is a credit buyer, is obligated to transfer ownership of SUT coin and become a credit debtor and repay the credit within the agreed period.

The contract period for repayment of accounts is a year, and the credit seller and the credit buyer agreed with each other to set the credit at the agreed price and pay in 365 days in installments, reflecting market principles. The company estimates that the value of the SUT will be higher in the future than it is in the beginning, and the SUT, which is essential to use the global real economy platform that the company directly plans, develops, and operates, will increase actual buying, reduce the supply of SUTs distributed in the market, and increase demand, so the price increase under the demand supply law is based on the demand and supply law. If the price of the SUT rises rather than the credit purchase price, successful global blockchain credit transactions are made due to the increase in the company's intangible assets and the increase in corporate value.

04

# Technology

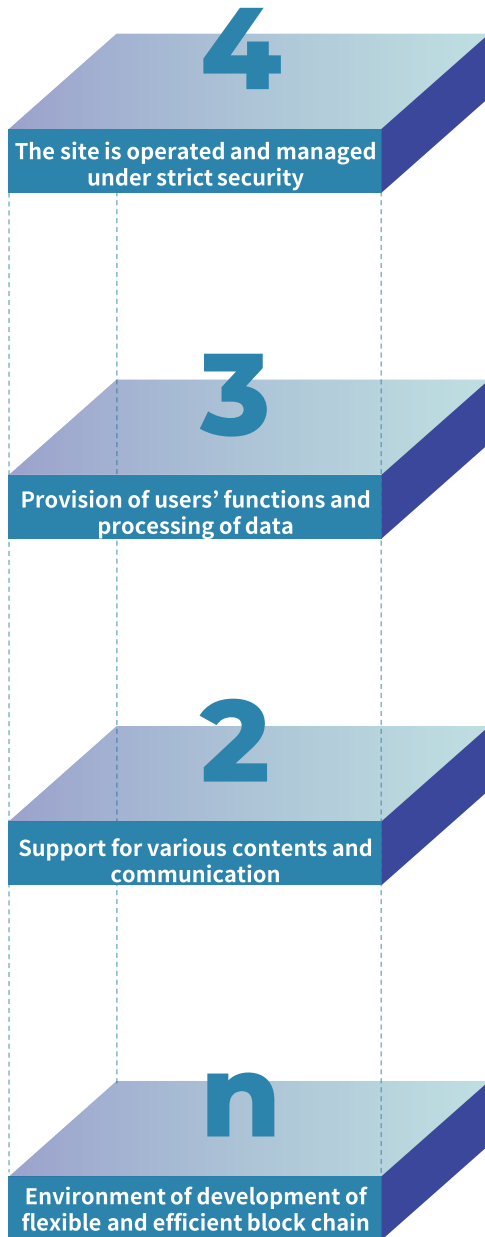

Building flexible development  
centered on users

**SUT Architecture**

Four Layer Structure

SUT consists of four layers : Blockchain platform, Application Programming Interface (API), Service and Admin.

**Admin Layer**

The information of the user's member and account is encrypted and managed by the key management system. Management functions will be given, such as the establishment of a system such as settlement and compensation for investment, the analysis of the overall function of the platform, and the inquiry and editing of DB of authorization and the operation of services.

**Service Layer**

The user's direct service is constructed. The flow of services can be implemented through the processing of basic components and data. The flow of the user's request is controlled and the results are sent and received to facilitate access.

**API Layer**

The support of various APIs supported by the blockchain platform is included, and the API of various platforms is utilized to maximize the utility of the user's experience and service.

**Blockchain Layer**

Blockchain technology, which provides an environment for development based on the Polygon network platform, will be utilized. Through this technology, safe and convenient development and operating systems are built, and smart contracts, issuance of NFT tokens and wallet management services are provided.

## SUPERTRUST Developer

### Korea

Meet our local & international development teams

NO	Name	Country	Role	Career	Final educational	Level of education	Major	History

**SUPERTRUST HISTORY**

**2024**

**Q4 [October-December]**

- Global Direct Advertising Platform MOAD Launched
- MOAD Truck Solidarity MOU Promotion
- Promoting listing on domestic/foreign exchanges

**2025**

**Q1 [January-March]**

- NATUREBOOK, a global real-time natural drawing platform, has been launched
- NATUREBOOK promotes 100,000 users at home and abroad
- Global Direct Advertising Platform MOAD – Promoting 10,000 Users

Please note that there are things that are not listed in the ongoing iona, roadmap and milestone.

There are overlapping parts of the roadmap for each quarter, but only large objectives are listed, and this roadmap may be delayed or changed depending on the situation.

06

# Distribution

Plan and operation of token issuance

**1**  
**Issuing and allocating SUT tokens**

By issuing dedicated tokens for the SUT platform, service development and a new ecosystem called the global blockchain real economy platform are implemented. The total number of tokens is 238,403,732 SUTs, and 50,000,000 SUTs have been incinerated, and the current circulation is 188,403,732 SUTs, and 100% of them are distributed. The foundation that issued the token does not have a single SUT token for the purpose of casting gains, and there is no increase in distribution in the future.

Name of token	SUPER TRUST (SUT)
Type of token	Polygon
The total amount of issuance and distribution	238,403,732 SUT (50,000,000 SUT incinerate)
Private sales	188,403,732 SUT (79%)
Circulation amount	188,403,732 SUT (79%)
Distribution volume	0 SUT (0%)

**2**  
**SUT token sales price**

Funds generated from SUT tokens are allocated 60% to R&D and invested in blockchain and real economy platform development. It plans to use 25% for marketing purposes and distribute 15% of platform operation to operate token proceeds.

R&D	60%
Marketing	25%
Operation	15%
